Welcome to CarePoint

CarePoint provides access to various DoD healthcare modules. Each application you wish to use will have a different registration process, but once you are initially granted access to CarePoint and the individual applications within, you will be able to seamlessly navigate from one application to another with a single login. You will no longer be required to remember different user names and passwords.

Welcome to CarePoint!

MHSPHP

Military Health System Population Health Portal

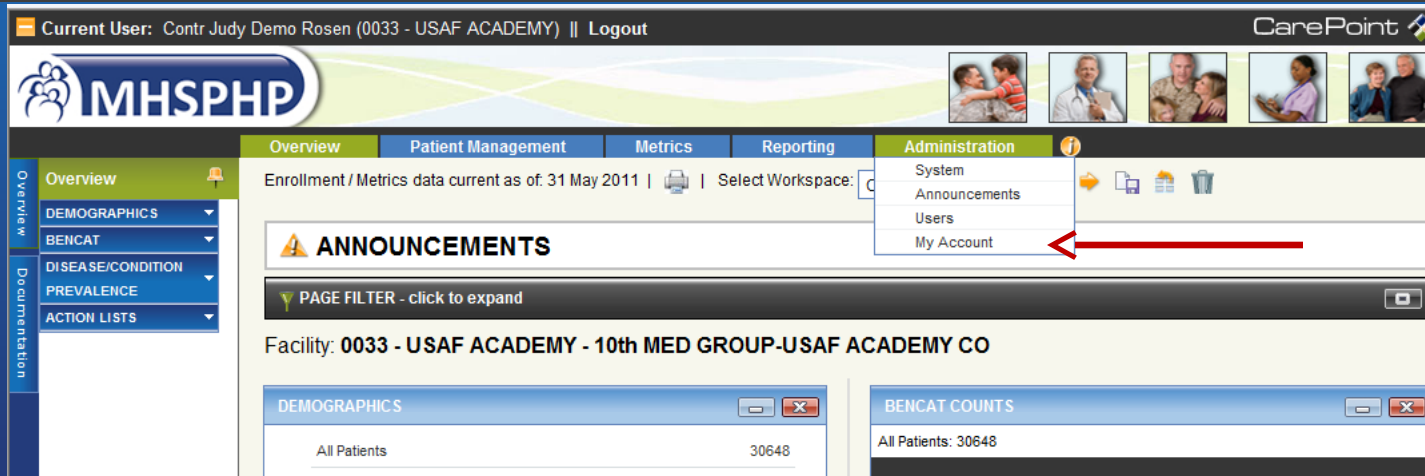

Go to MHSPHP

Military Health System Population Health Portal (MHSPHP) module transforms Department of Defense (DoD) and Network health care administrative data into actionable information. The application utilizes health care action lists to identify Military Treatment Facility (MTF) TRICARE Prime and Plus enrollees in need of potential clinical preventive services, disease management or case management. The Healthcare Effectiveness Data Information System (HEDIS®) methodologies or DoD/VA Clinical Practice Guidelines outline the specific data sources and methodology used within MHSPHP. The data available through this application provides both patient level and general population statistics concentrating on demographics, disease management and preventive services information.

MHSPHP
Military Health System Population Health Portal

How to request Patient Data Access

- Select Administration from page menu
- Select My Account
- Select “Request Additional Access”
- Select request functional level access

MHSPHP

Military Health System Population Health Portal

OVERVIEW PAGE

- Contains Summary data
- Page filter to select data
- Navigation Menu on the left
- Charts
- Action List counts reflect medical home data
 - Exclusions take effect instantly
 - Labs are updated nightly

How to switch from Aggregate to Functional

The screenshot shows the MHSPHP interface with a 'PAGE FILTER' header. Below the header, there are two radio buttons: 'Aggregate' and 'Functional'. A red arrow points from the 'Aggregate' button to the 'Functional' button, indicating the action to be taken. Below the radio buttons, there is a section titled 'DMIS / MTF' with a sub-label '(ctrl + click to select multiple items)'. This section includes a 'Filter List by Text' input field with a magnifying glass icon and a list of items: 6221 -- TRICARE OUTPATIENT CHESAPEAKE, 7234 -- MENWITH HILL MEDICAL CENTER, 7917 -- REMOTE 17(NORTH), 7918 -- REMOTE 18(SOUTH), 7919 -- REMOTE 19(WEST), 0308 - ABERDEEN PROVING GROUND - KIRK AHC-ABERDEEN PRVNG GC, and 0620 - AGANA - NH GUAM-AGANA. To the right of the 'DMIS / MTF' section, there are two dropdown menus: 'Provider Group' (currently showing 'No Selected Provider Group') and 'PCM Name' (currently showing 'No Selected PCM Name'). At the bottom right of the interface, there are two buttons: 'Apply' and 'Clear'.

When you click on the functional view you will only see the MTFs you have permission to see patient level information

- Direct Care (most monthly some nightly)
- Purchased Care (monthly updates)
- Enrollment information (monthly updates)
 - DEERS enrollment info is the key to all metrics and lists
 - Only enrolled pts appear on lists
 - Metrics reflect only data through the enrollment date

Why are metrics only updated monthly?

- Metrics are tied to enrollment
- Enrollment information released from DEERS monthly
- Metrics only reflect tests or encounters that occurred prior to that end enrollment date
 - We don't know if pt enrolled after that date
- Identifying patients for lists based on encounter/enrollment data up to that end enrollment date

Direct Care Data Sources: Nightly Updates

- Lab test data updated nightly on action lists and patient charts
 - A1C, Cholesterol, Paps
 - Tests are pulled by test name and/or CPT codes
 - If MTF changes test name, please verify data reaches MHSPHP
- Mammograms updated nightly
 - Tests are pulled by name and/or CPT codes
 - If MTF changes test name, please verify data reaches MHSPHP
- Colorectal screens updated nightly

How is data displayed?

- Portlets!
 - Boxes of data displayed to meet user's needs
 - Tables or graphs
 - Movable
 - Exportable
 - Can remove or add to workspace
